

# Comsen Pedestal C1 1000

The C1 1000 is the earlier version of the current C2 1000 pedestal model. Customers continue to select this model when they want to match with existing C1 1000 assets and require only 1 or 2 outlets plus water. Price is marginally cheaper than the Mark 2 model. This tried and tested power pedestal has stood the test of time in the field under the harshest weather conditions. The C1 1000 modular design continues to provide the essential services. Pedestals are bolted to a base plate 240mm x 240mm square which must first be bolted to a prepared concrete slab (approximately 500mmx500mm) using four 3/8" dynabolts. For accurate installation Comsen recommends the custom made rag bolt if new concrete is being laid.

## Features:

- Impact and UV resistant non corrosive PVC body with a 20 year guarantee
- Proven in the field under the harshest weather conditions
- Design provides resistance to vandalism
- Proven watertight with RCBO's fitted inside the weatherproof, IP66 rated enclosures
