

Comsen

M 500 Pontoon

This popular tried and tested service pillar for private jetties has stood the test of time and many storms across Australia. The compact modular design provides simple and effective power, water and light. The PVC non corrosive body is impact and UV resistant. A robust lockable 15amp 56IP rated switched power outlet is included with RCD protection coming from the home or office circuit. Power can be controlled at the main switchboard or at the jetty. The pedestal is bolted to a base plate 180mm x 180mm square which is fixed to the jetty. With the modular design parts are readily available should they ever be required.

Features:

- Impact and UV resistant non corrosive PVC body with a 20 year guarantee
- Proven on jetties under the harshest weather conditions
- Design provides resistance to vandalism
- Proven watertight with IP66 rated enclosure
- Access for electricians to power outlet and electronics
- Modular system design allows for part replacement only in the event of accidental damage
- Quality electrical components with a 5 year warranty
- White or Paperbark colour to blend with the outdoor environment
- All parts moulded and certified to ISO quality manufacturing standards in Australia
- Design and electronics fully compliant to the Australian/ New Zealand Standard – Electrical Installations (Marinas and recreational boats) AS/NZS 3004.1:2008
- All spare parts available and listed on www.comsen.com.au
