

Comsen Pedestal M1 500 Pontoon

The M1 500 Pontoon service pillar for jetties has stood the test of time and many storms across Australia. The compact slimline design provides simple and effective power, water and light for private jetties. The PVC non-corrosive body is impact and UV resistant. A robust lockable 15amp 56IP rated switched power outlet is included with RCD protection coming from the home or office circuit. Power can be controlled at the main switchboard or at the jetty. A LED light, light sensor PE cell, and a tap are included. The pedestal is bolted to a base plate 180mm x 180mm square which is fixed to the jetty. The base plate of this unit is designed to break on high impact saving the rest of the pillar. With the modular design parts are readily available should they ever be required.

Features:

- Impact and UV resistant non corrosive PVC body with a 20 year guarantee
- Proven in private jetties under the harshest weather conditions
- Design provides resistance to vandalism
- Proven watertight with easy access for maintenance
