

Comsen Pedestal M2 500 Mini Berth Mate

The M2 500 modular compact design is a very capable service distributor for marinas or jetties. Buyers usually choose this model when they need to provide essential 15amp outlets, water and light. The extra space in the head of this service pillar allows for more electricals including meters for reading and charging power and water, or room for 3 phase power. Whilst the design is impact resistant, accidents can happen. The base plate of this unit is designed to break on high impact saving the rest of the pillar. Parts if ever required are available to order from our website.

Features:

- Impact and UV resistant non corrosive PVC body with a 20 year guarantee
- Proven in marinas under the harshest weather conditions
- Design provides resistance to vandalism
- Proven watertight with RCBO's fitted inside the weatherproof, IP66 rated enclosures
- Easy access for electricians to all power outlets and electronics
- Modular system design allows for many customised service combinations to suit needs
- Quality electrical components and safety switches providing reliability with a 5 year warranty, 3 years for LED's
- White or beige colour to blend with the outdoor environment
- All parts moulded and certified to ISO quality manufacturing standards in Australia
- Design and electronics fully compliant to the Australian/ New Zealand Standard – Electrical Installations (Marinas and recreational boats) AS/NZS 3004.1:2008
- All spare parts available and listed on www.comsen.com.au
