

Technical Information

EXTREME UNITS - Caravanparks

Comsen Extreme units are all manufactured from Anodised aluminium. Anodised to 25 microns for extreme durability.

Robust 15amp 56IP rated power outlets are individually protected by RCBO. RCBO`s are fitted inside the weatherproof, IP66 rated enclosures.

Extreme units can accommodate up to 12x 15amp single phase and 2x 32amp, 63amp, 125amp and 1x 250amp 3phase outlets, KWH meters, TV outlets and data/phone.

Electric cabling enters the unit through the base.

The unit comes with Low voltage LED light for longer life and lower running cost.

Water mains are connected to the unit through the base to an optional single, two or four outlet manifold. The plumbing manifold is installed in a factory and provides water outlets and metering if required.

The Extreme units are bolted to a base 290mmx140mm or wide 290mmx250mm and the base is attached to the unit prior to installation and bolted together using stainless steel bolts.

Rag bolt mounting assembly is available as an option.

Extreme units are approved by Energex Approvals Laboratory.
Laboratory Report No. 10/AL/016
Test specification: AS 60529 – 2004 (Enclosure Designation IP45)
